Sonicaid Team maximum flexibility

Small, compact design for easy positioning.

- Change recorder paper easily and quickly.

- Twin fetal heart rate scales provide the clearest differentiation between two heart rates and avoids the difficulty of interpreting offset or overlapping traces.

- Models range from antepartum singleton monitoring to intrapartum twins monitoring.

**Sonicaid FetalCare**
Feel Secure with PC Based NST Storage & Analysis

With Sonicaid’s exclusive FetalCare software your NST signal is downloaded simultaneously or through monitor memory to your PC. The NST is analyzed based on a database of 48,000 records and stored on the hard drive. Each patient record may be transferred to CD-ROM, or a backup system of your choice for permanent archiving.

**Feel Secure with PC Based NST Storage & Analysis**
xibility and ease of use

- Can be connected to major obstetrics management systems, including Sonicaid Axis central review and archiving system.

Team
Antepartum Singleton Monitoring
Ideal for your basic monitoring needs during pregnancy, Sonicaid Team provides the functional versatility of the 'Team range'. Ultrasound, external Toco and fetal event marker.

Team Duo
Antepartum Monitoring for Twins
Team Duo features an additional ultrasound channel allowing accurate assessment of twin fetal heart rate.

Team IP
Basic Intrapartum monitoring
Fetal monitoring during admission, labour and delivery. Team IP is an ideal entry-level monitor offering fetal ECG plus intra-uterine pressure in addition to twins monitoring.

Customer Focus

The needs of patients and users is the core focus of our company, that is why we consider everyone as part of our design team. Working with users and mothers on product design ensures the final product we produce meets today's and tomorrow's changing needs.

Innovation

Innovation is at the heart of our organization. Our record of pioneering achievements include the first hand-held fetal heart rate detector, the first commercial EMG, the first 24 hour ambulatory ECG and EEG recorders, and the first full body magnets for Magnetic Resonance Imaging (MRI). Proof of our long standing commitment to transform new technology into effective products and solutions for our customers.

Quality

In a joint venture with Siemens we are the acknowledged world leader in the development and manufacture of magnets for MRI.

Staff

The success of our business and the service we offer our customers is in the hands of our staff. Recruitment and retention of high-quality staff is a key company objective. Continuing education and training builds upon the existing skills and knowledge acquired over many years. Clinical application training ensures a company-wide understanding of patient and user needs.

Support

A worldwide network of field engineers and support organizations provide first class service to our customers. Our aim is to ensure total support for the lifetime of our equipment leaving you to the real business of patient care.

excellence in healthcare

The Sonicaid® range of Fetal Monitoring Equipment has been designed, manufactured and distributed by Oxford Instruments Medical Limited, an international company that has always had an enviable reputation for innovation and quality of its products.

Oxford Instruments Medical Limited has been certified by the UK's Quality Assurance Accreditation (UKAS) as an approved medical devices manufacturer as meeting the requirements of BS EN ISO 9001, BS EN 46001 and the Medical Devices Directive (MDD); CE marked. The Sonicaid® range is CE marked in accordance with the European Council Directive (EC) 93/42/EEC concerning medical devices. The Sonicaid® range also bears the ETL Listing Mark, which is a nationally Recognized Testing Laboratory (NRTL) mark, in the United States and Canada.

The Sonicaid® range is a registered trademark of Oxford Instruments Medical Limited. Oxford Instruments Medical reserves the right to change product specification without notice, in line with our policy of constant product improvement.
